U.S > Patent Application 10/790386

Listing of Claims

- (withdrawn) A composition for preventing or reducing skin aging and wrinkling, which comprises at least one matrix metalloproteinase inhibitor (MMPI) and at least one estrogen or phytoestrogen.
- (withdrawn) The composition according to claim 1 further comprising a cosmetically or pharmaceutically acceptable topical carrier.
- 3. (canceled)
- 4. (withdrawn) The composition according to claim 1 wherein said estrogen or phytoestrogens is a plant extract, a purified phytoestrogen, a synthetic phytoestrogen, a natural estrogen, or a synthetic estrogen.
- (withdrawn) The composition according to claim 4 wherein the plant extract is black cohosh extract.
- 6. (withdrawn) The composition according to claim 1 wherein the phytoestrogen is a triterpenoid glycoside.
- (withdrawn) The composition according to claim 1 wherein the molar ratio of MMPI to estrogen or phytoestrogens is between about 10:1 andabout 1:10.
- (withdrawn) The composition according to claim 1 comprising a
 concentrations of about 10 ng/mL to about 100 mg/mL of the MMPI and
 estrogen or phytoestrogen.
- (withdrawn) The composition according to claim 1 further comprising compounds active at blocking UVA and UVB radiation.
- 10. (canceled)

U.S. Patent Application 10/790,386

- 11. (canceled)
- 12. (canceled)
- 13. (original) A method for minimizing the adverse effects of aging on skin comprising contacting said skin with (a) a matrix metalloproteinase inhibitor, MMPI, and (b) an estrogen or phytoestrogen.
- 14. (original) The method according to claim 13 wherein said contacting is conducted at least once every twenty-four hours for the entire period during which said minimizing of the adverse effects of aging on skin is conducted.
- 15. (original) The method according to claim 13 wherein said contacting is conducted prior to exposure to sunlight.
- (original) The method according to claim 15 wherein said method further comprises contacting the skin with compounds which block UVA and UVB.
- (original) The method according to claim 13 wherein said contacting comprises administering said MMPI and estrogen or phytoestrogen in a dermal preparation.
- 18. (original) The method according to claim 17 wherein said dermal preparation comprises about 40% by weight of water; up to about 35% by weight, of a permeation enhancing compound selected from the group consisting of dibutyl adipate, isopropyl myristate and combinations thereof; up to about 15% by weight of a fatty alcohol; and one or more emollients or moisturizing humectants.
- 19. (original) The method according to claim 13 for treating wrinkling in postmenopausal women.

U.S. Patent Application 10/790,386

- 20. (original) The method according to claim 13 for treating wrinkling in pre-menopausal women.
- 21. (original) The method according to claim 13 for treating wrinkling in men.
- 22. (original) The method according to claim 13 which comprises repeatedly performing said contacting over an extended period of time.
- 23. (original) A method for minimizing, treating, reversing or avoiding the adverse effects of smoking or smoke exposure on skin comprising contacting said skin with(a) a matrix metalloproteinase inhibitor, MMPI, and (b) an estrogen or phytoestrogen.
